Definico

eq 1.40  $\Rightarrow \text{var}[x] = E[x^2] - E[x]^2$   
B.d.g

Varianca condicional

$$\text{var}_x[z|y] = E_x[z^2|y] - E_x[z|y]^2$$

$$= E_y[E_x[z^2|y] - E_x[z|y]^2] + E_y[E_x[z|y]^2] - E_y[E_x[z|y]]^2$$

$$= E_y[E_x[z^2|y]] - E_y[E_x[z|y]^2] + E_y[E_x[z|y]^2] - E_y[E_x[z|y]]^2$$

$$E_x[x^2]$$
